Phycomycin® SCP Algaecide and Oxidizer

Non-copper algaecide and cyanobacteriocide

Phycomycin® SCP Algaecide and Oxidizer controls cyanobacteria (blue-green algae). Also proven effective on green algae and diatoms.

Advantages

• Controls the cyanobacteria that causes taste and odor in drinking water
• Rapid acting non-copper algaecide
• Granules provide targeted delivery to benthic cyanobacteria
• Low toxicity to fish, aquatic invertebrates and other non-target organisms
• Certified to NSF/ANSI Standard 60 for drinking water
Application

Apply by broadcasting or mechanical spreader. Product rapidly dissociates to sodium carbonate and hydrogen peroxide molecules within minutes.

Restrictions & Regulatory Information

Waters treated with this product may be used for swimming, fishing, further potable water treatment, livestock watering or irrigating turf, ornamental plants or crops after treatment.

Figure 1. For use in: lakes, ponds and drinking water reservoirs; irrigation, drainage and conveyance ditches, canals, laterals; estuaries, bayous, lagoons; water gardens and water features; impounded water and waste water; and aquaculture.

Figure 2. Accurately targets cyanobacteria, which can cause the water to have an unpleasant odor and taste, while minimizing the impact on non-problematic species.
